Bureau of Land Management
Jackson District Office
Post Office Box 11348
Jackson, MS 39213

Dear Mr. Wallace:

Re: Proposed Modification to Prospecting Permit ES-15255,
Tract 60-d, South Carolina

Enclosed is a map of our proposed exploration activities for the last six months of 1987. Two backhoe trenches are to be constructed: one on survey line 30W from our baseline to the southern property line approximately 600 feet in length; the second on line 27W from 2S to the southern property line (400 feet). Both trenches will be approximately 3 feet wide and 8 to 12 feet deep. In addition, one diamond core hole will be drilled on line 28W at 5S to an estimated depth of 500 feet and a core diameter of 2.5 inches.

Our trench crosses the access road, and a 20-foot section will be left intact to allow vehicles to cross. All soil disturbance will be levelled and reseeded to original contour. No merchantable timber will be removed as the property has already been timbered with no replanting to date. Assay results will be forwarded pending their receipt.

Sincerely,

AMSELCO MINERALS INC.

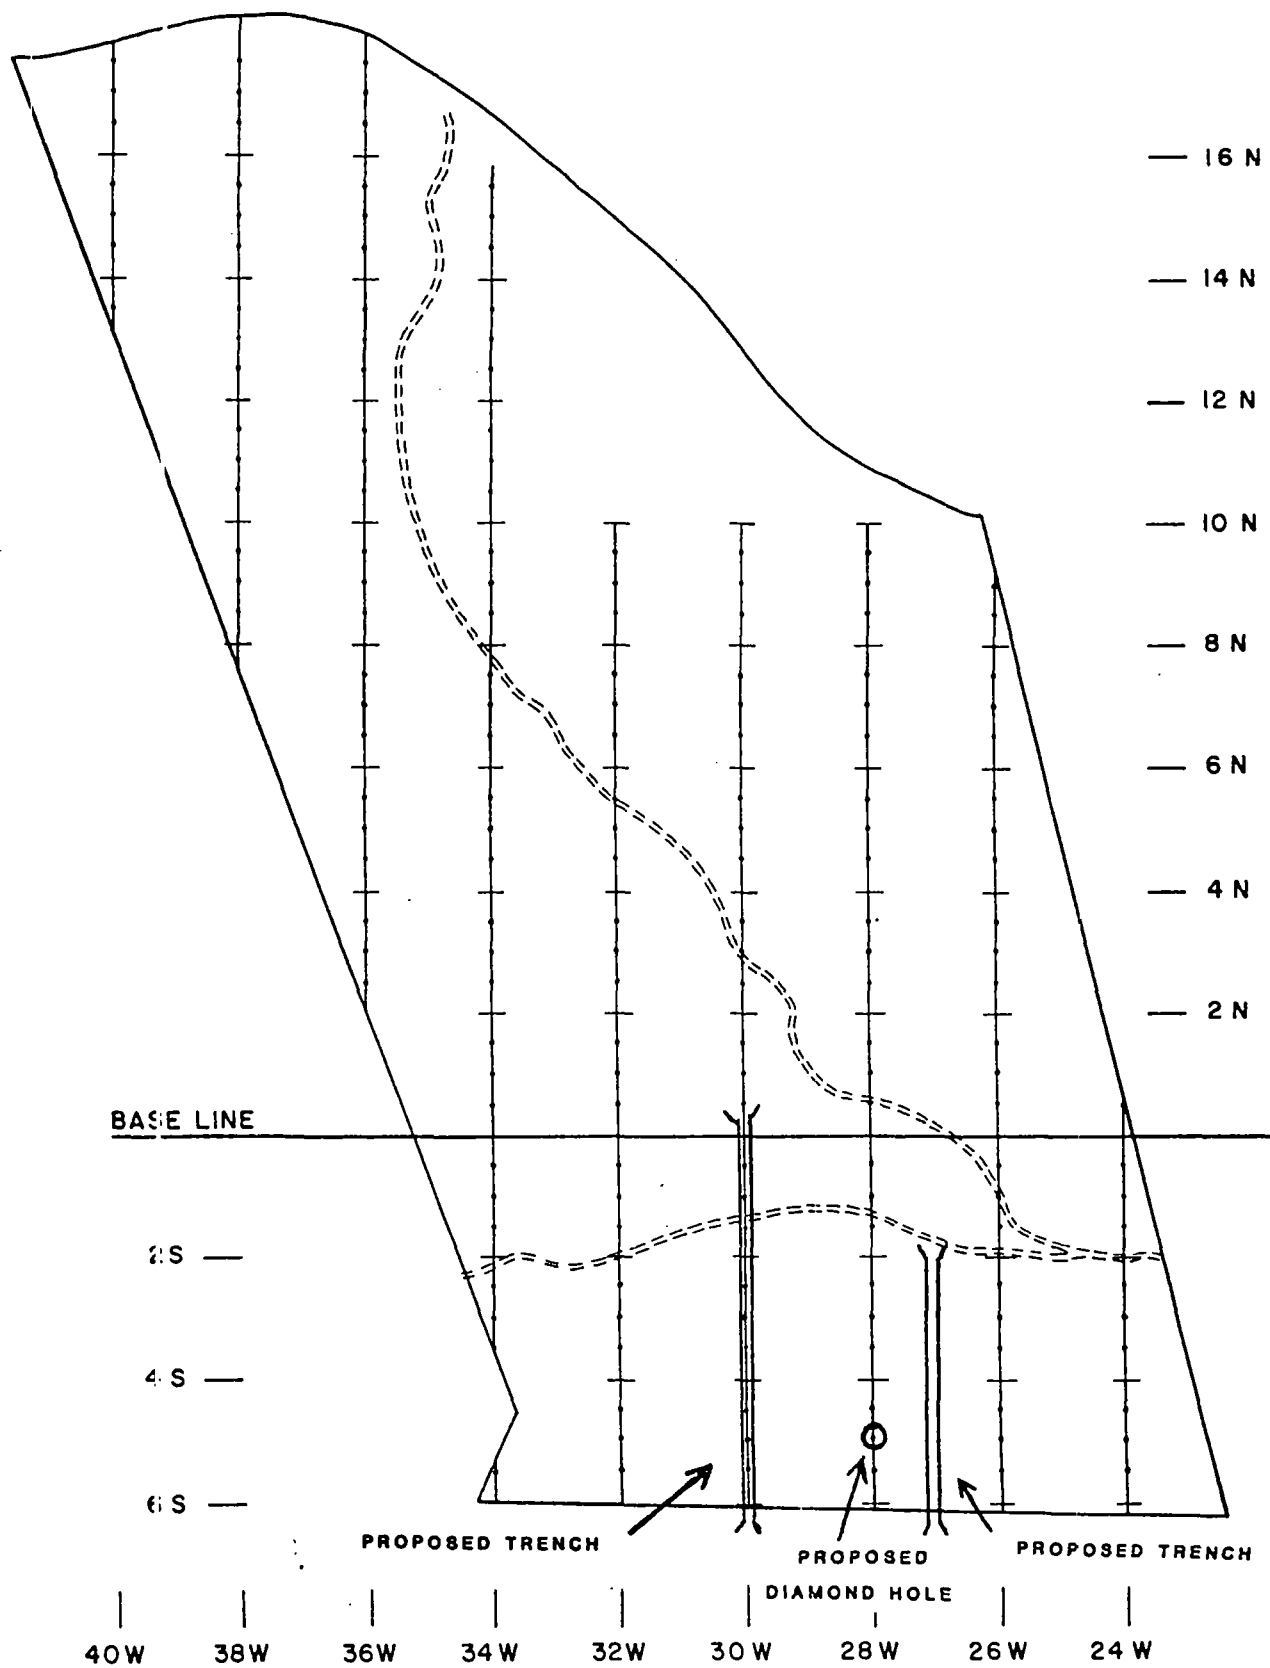

David R. Watkins
Geologist

DRW/dn
